many people are having same issue. When people log out and log back in it takes up another attendee hence the issue. We will make sure everyone gets credit as well as post the presentations on line shortly.

**Subject:** Webinar

Hi Jay,

I had a glitch and had to reboot my computer. I got locked out of webinar. I called customer service for the webinar and they said it's locked.

If I can't get back in I will just look at slides later.

Thanks,  
Monica
